

SHAFIYA NAAZ

Data Analyst | +91-7709491717 | shafiyanaaz126@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on internship experience and a strong foundation in Python, SQL, Power BI, Tableau, and Excel. Experienced in data cleaning, exploratory analysis, KPI reporting, dashboard development, and AI-assisted analytics. Comfortable using AI tools to accelerate analysis while validating outputs, writing and explaining SQL/Python independently, and turning data into clear business insights. Curious, detail-oriented, and eager to learn new products, domains, and datasets in collaborative remote environments.

EXPERIENCE

BharatCares × IBM SkillsBuild — Data Analysis with AI Intern | 2026

- Developed practical skills in Python, SQL, data cleaning, exploratory data analysis, visualization, statistical analysis, and AI-assisted analytics through hands-on projects.
- Used AI tools to accelerate research and analysis, then reviewed and validated outputs to identify patterns, trends, anomalies, and data-driven insights.
- Built experience with prompt engineering, AI-powered analytics, Power BI/Tableau concepts, and communicating analytical findings for real-world problems.

InAmigos Foundation — Data Analyst Intern

- Conducted structured research across 10+ Indian NGOs and 15+ student opportunities, organizing and validating sectors, eligibility, initiatives, links, and deadlines using Excel/Google Sheets.
- Used AI-assisted research and analytical techniques to analyze social-impact data, identify trends, summarize findings, and produce actionable insights.
- Evaluated NGO practices and developed 5 data-informed recommendations to improve outreach, volunteer engagement, fundraising, and digital presence.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib) | SQL

Databases: PostgreSQL | SQL Server (SSMS) | Snowflake

BI & Analytics: Power BI | Tableau | Excel | Power Query | DAX | Data Modeling | Star Schema | KPI Reporting

Data Analysis: Data Cleaning | EDA | Data Validation | Data Visualization | Statistical Analysis | Business Insights

Data Engineering: ETL | Apache Airflow (Basics) | dbt (Basics)

AI & GenAI: Generative AI | AI-Assisted Data Analysis | Prompt Engineering | AI Output Validation | ChatGPT | Claude AI

Tools: Git | GitHub | VS Code | Jupyter Notebook

PROJECTS

Healthcare Analytics Project | Python • SQL • Power BI

- Cleaned healthcare data in Python by handling duplicates, missing values, and inconsistent data types, improving data quality for analysis.
- Wrote SQL queries to analyze hospital revenue, patient admissions, insurance providers, and treatment trends.
- Built an interactive Power BI dashboard with KPIs, revenue trends, demographics, hospital performance, reusable DAX measures, and an optimized data model.

Customer Behavior Analysis | Python • SQL • Power BI

- Analyzed customer purchasing behavior using Python and SQL to identify trends, segments, and business insights.
- Performed data cleaning, EDA, and visualization to investigate customer patterns and key performance indicators.
- Built an interactive Power BI dashboard to monitor customer segments and business metrics.

SQL Exploratory Data Analysis (EDA) | SQL

- Performed EDA on a real-world dataset using JOINS, CTEs, Window Functions, Aggregations, and filtering to investigate business trends.
- Translated query results into actionable insights and validated unexpected values during analysis.

SQL Data Warehouse | SQL • SSMS

- Designed a Bronze–Silver–Gold data warehouse architecture in SQL Server with ETL workflows and star-schema fact/dimension models.
- Used JOINS, CTEs, Window Functions, and stored procedures to prepare data for reporting and analytics.

AI-Assisted Data Analytics Project | IBM Bob

- Built a lightweight data analytics project using IBM Bob to accelerate dataset exploration, analysis, and insight generation with AI-assisted workflows.

- Applied Python-based data processing and analytical techniques to clean, explore, and interpret structured data while validating AI-generated outputs.
- Documented analytical findings and project results in a reproducible workflow, demonstrating practical use of AI tools alongside core data analysis skills.

VIRTUAL INTERNSHIP EXPERIENCE

Deloitte Data Analyst Virtual Experience Program — Forage

- Analyzed business datasets to identify trends, support decision-making, and communicate analytical findings using visualization best practices.

EDUCATION

Bachelor of Computer Applications (BCA) | 2025

CERTIFICATIONS

- Deloitte Data Analyst Virtual Experience — Forage
- DataCamp — Exploratory Data Analysis
- DataCamp — dbt Fundamentals
