Data Analyst | +91-7709491717 | shafiyanaaz126@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with a strong foundation in Python, SQL, Power BI, and Tableau. Experienced in analyzing real-world datasets, building business intelligence dashboards, and translating data into actionable insights to support organizational growth.

EXPERIENCE

BharatCares × IBM SkillsBuild — *Data Analysis with AI Intern*

2026 – Present

- Developing practical skills in **AI-assisted data analysis, Python, SQL, data visualization, and statistical analysis** through hands-on, industry-focused projects.
- Applying **AI tools and analytical techniques** to explore datasets, identify patterns and trends, and generate data-driven insights for real-world problems.
- Building knowledge of **AI-powered analytics, prompt engineering, exploratory data analysis, and data-driven decision-making** through structured learning and project-based assignments.

InAmigos Foundation — *Data Analyst Intern*

- Conducted structured data research and collection across 10+ Indian NGOs and 15+ student opportunities, organizing and validating information on sectors, eligibility, initiatives, application links, and deadlines using Excel/Google Sheets.
- Leveraged AI-assisted research and analytical techniques to analyze social-impact topics, identify trends, summarize key findings, and generate actionable insights across NGOs, education, volunteering, and fundraising.
- Evaluated successful NGO practices and developed 5 data-informed recommendations to improve outreach, volunteer engagement, fundraising, and digital presence, strengthening data analysis, research, and problem-solving skills.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib)

Databases: SQL, PostgreSQL, SQL Server (SSMS), Snowflake

Business Intelligence: Power BI, Tableau, Excel, Power Query, DAX, Star Schema, Data Modeling

Data Analysis: Data Cleaning, EDA, Data Visualization, KPI Reporting

Data Engineering: ETL, Apache Airflow (Basics), dbt (Basics)

Tools: Git, GitHub, VS Code, Jupyter Notebook

AI Tools: ChatGPT, Claude AI

PROJECTS

Healthcare Analytics Project / *Python • SQL • Power BI*

- Cleaned healthcare data using Python by handling duplicates, missing values, and inconsistent data types.
- Wrote SQL queries to analyze hospital revenue, patient admissions, insurance providers, and treatment trends.
- Built an interactive Power BI dashboard with KPIs, revenue trends, demographics, and hospital performance; created reusable DAX measures and optimized the data model.

Customer Behavior Analysis / *Python • SQL • Power BI*

- Examined customer purchasing behavior to identify trends and business insights.
- Performed data cleaning, exploratory data analysis (EDA), and visualization using Python and SQL.
- Built an interactive Power BI dashboard to monitor customer segments and key performance metrics.

SQL Exploratory Data Analysis (EDA) / *SQL*

- Performed exploratory data analysis on a real-world dataset using advanced SQL techniques.
- Used JOINS, CTEs, Window Functions, and Aggregate Functions to generate actionable business insights.

SQL Data Warehouse / *SQL • SSMS*

- Designed a Bronze–Silver–Gold data warehouse architecture in SQL Server and built ETL workflows with star-schema fact/dimension models for analytics.
- Used JOINS, CTEs, Window Functions, and stored procedures to support reporting.

VIRTUAL INTERNSHIP EXPERIENCE

Deloitte Data Analyst Virtual Experience Program (Forge)

- Analyzed business datasets to identify trends and support decision-making; created dashboards and communicated analytical findings using visualization best practices.

EDUCATION

Bachelor of Computer Applications (BCA)

CERTIFICATIONS

- Deloitte Data Analyst Virtual Experience – Forge
- DataCamp – Exploratory Data Analysis
- DataCamp – dbt Fundamentals
